This is a beautiful custom built home on 1.69 acres located in Watson. This open floor plan allows you to see from the foyer into all the main living areas. There is a spacious dining room, large living room with a ventless gas fireplace and the kitchen. The kitchen hosts a 5-burner gas stove, a corner pantry, a side bar for your coffee or favorite beverages and an enormous center island. There is a roomy half bath off the back entry door. This split floor plan gives you 2 bedrooms to the right with a jack and jill bath. Both rooms have nice closet space. The primary bedroom is a great size and has a pretty primary bath. The bathroom has a custom built tile shower with a glass surround, more than enough counter and cabinet space for any adult and a standalone tub. Moving out back you have a lovely back porch with a granite countertop with a sink, built-in grill, trash drawer and a space for a small drink fridge. Further out back you will find a 30 X50 shop with a 20 lean-to off the back and two 10 x10 roll up doors. Best thing yet is it is heated and cooled!
